

ATMOSPHERIC WATER FROM THE AMAZON RAINFOREST

AWA is born from the invisible cycle of the Amazon forest.

The water is lifted into the air by the trees, condensed from the atmosphere and collected without ever touching the ground.

Each bottle holds purity, and a deep relationship with time, with the forest, and with what sustains life.

AWA elevates.

AWA's operation follows silent principles:

- / Renewable water harvesting
- / Complete absence of plastic
- / Carbon-negative logistics
- / Active regeneration of the Amazon forest
- / Responsible engagement with local communities

Sustainability is a silent operational principle.

AWA is presented selectively in restaurants and hotels where origin, aesthetics, and conscious choices are an essential part of the experience.

Each partnership is evaluated with care, respecting the rhythm, the context, and the identity of each establishment.

For those that understand the value of silence and presence, the dialogue is open.
